Green X 12 SE

SEE CLEAR. START SMART.

MULTI FOV
SMART FOCUS (One Scan, Full Arch+Endo-focus views)
AUTOMATIC 3D SEGMENTATION
AUTO PANO

vatech

Diagnosis begins with what you can see.
When essential details are unclear, diagnosis becomes uncertain and treatment planning becomes more challenging.

Different cases require appropriate fields of view.
Different diagnoses call for clear and consistent imaging perspectives.

See more. Plan safer.

Implant treatment begins long before drilling.
Bone width, nerve location, sinus anatomy — all exist in three dimensions.
Clear visualization helps clinicians evaluate anatomy accurately and plan treatments with confidence.

A clear view supports safer surgical planning and predictable outcomes

Green X 12 SE

Technology that supports your diagnosis, functions that inspire confidence

Automatic 3D Segmentation with DAVIS

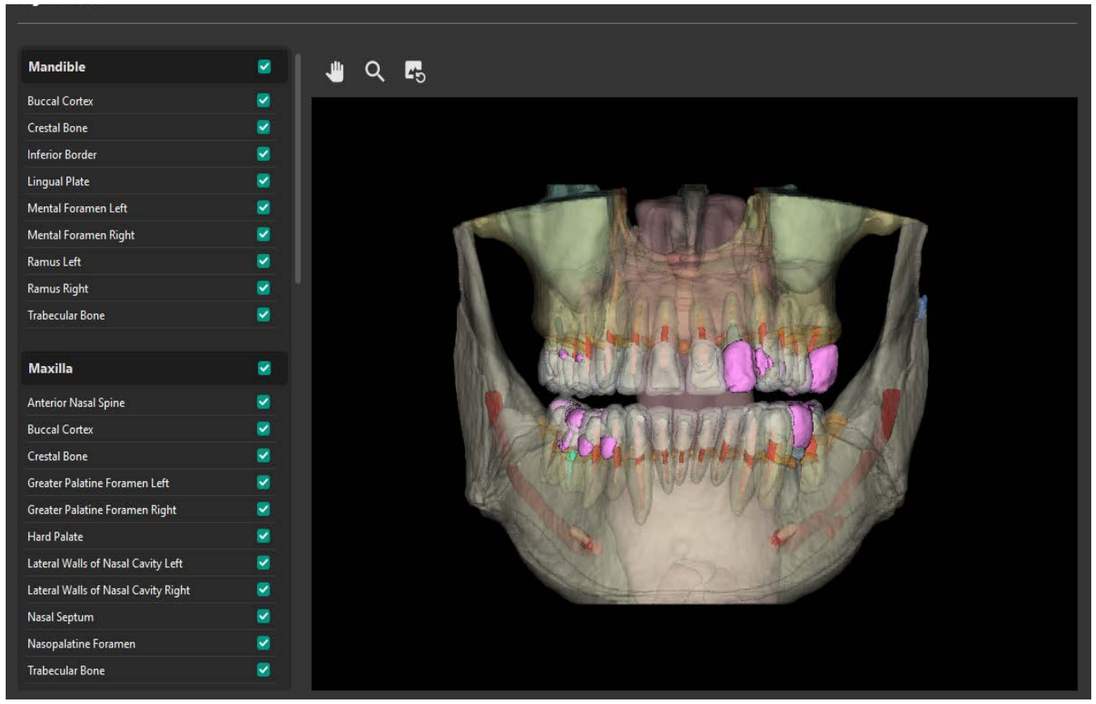

DAVIS Toolkit for Segmentation

Automatic 3D segmentation with the DAVIS Toolkit delivers precise anatomical insights for accurate diagnosis, safer treatment planning, and clearer patient communication.

Identify key structures for accurate clinical decisions

Secure implant and endodontic treatments with 3D references

Explain conditions clearly for improved patient confidence

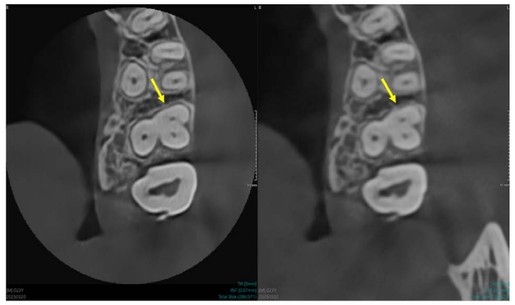

5 Views in a Single Scan

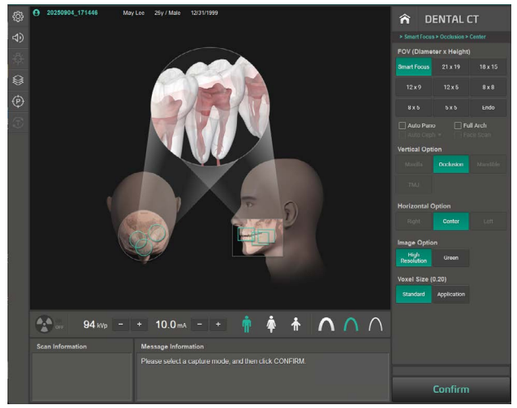

Smart Focus [Optional]

One Scan → Full Arch, Auto Pano, and three Endo-focus views (70 µm voxel, 4×4 cm FOV)

Gain safety and efficiency — identify fine anatomy, reduce extra scans, shorten chair time

Smart Focus

Full Arch(12X8.5)

Multi FOV Selection

Select the right FOV to match each diagnostic need — from endodontics to full arch evaluation.

Advanced Pano

Captures only the selected region to reduce radiation (Insight PAN)

Automatically compensates for arch shape distortion (Magic PAN)

Provides a 2D panoramic image automatically during 3D scanning (Auto Pano)

Focused 4×4 Imaging

Capture detailed anatomical structures within a compact field of view (4×4 FOV)

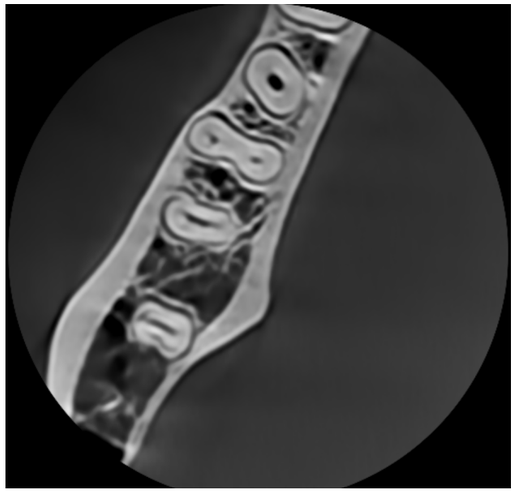

Clear visualization for everyday implant and general diagnostic cases

Reliable 3D insight without specialized endodontic configuration

Scout Capture

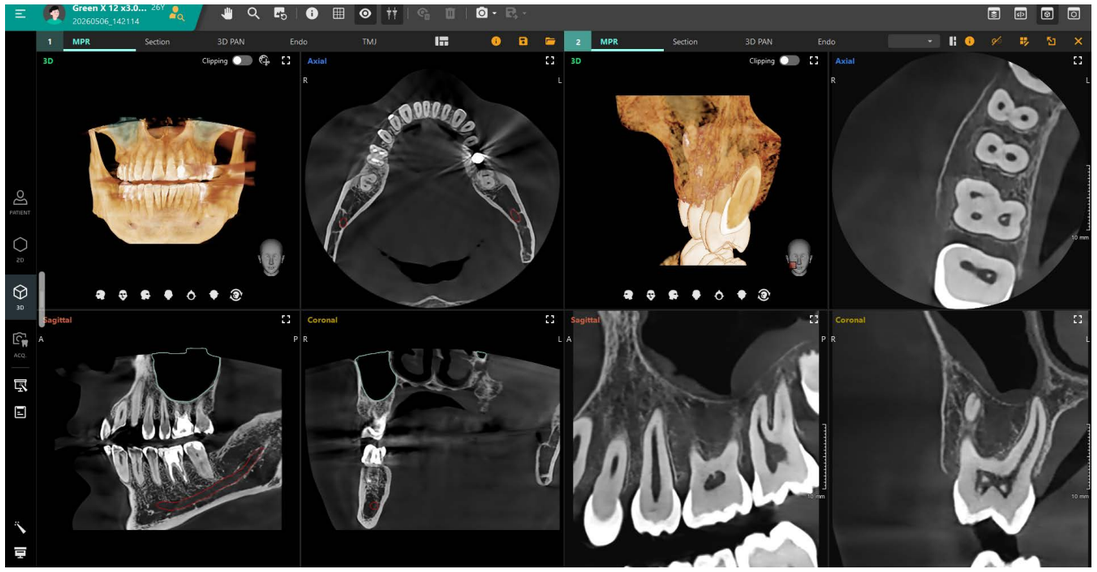

Provides a 2D preview before 3D scanning, allowing precise targeting of the desired area and reducing the risk of misalignment or unnecessary exposure.

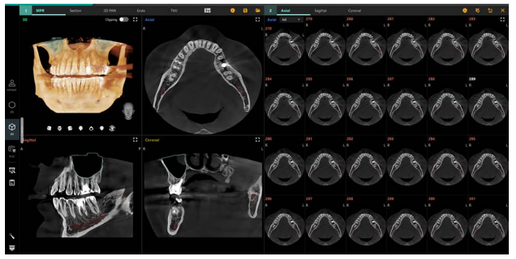

Multi CT Sync

View and compare two CT scans of the same patient side by side within a single viewer — instantly visualize changes such as implant placement or bone healing.

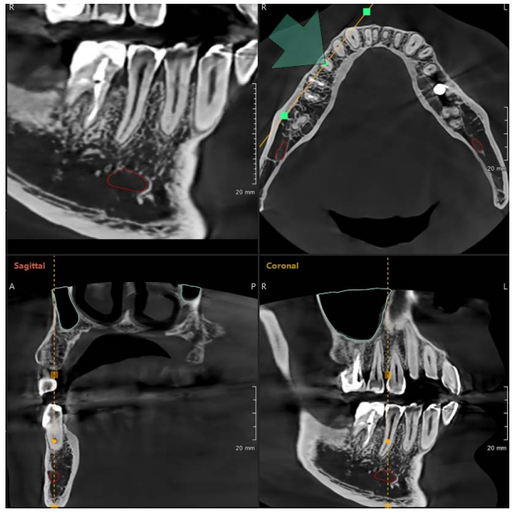

Multi Slice View/Oblique View

View cross-sectional slices in detail for faster, more confident diagnosis. Rotate images freely in 360° to plan with complete accuracy from any angle.

Multi Slice View

Oblique View

Specifications [Green X 12 SE : PHT-40CHS]

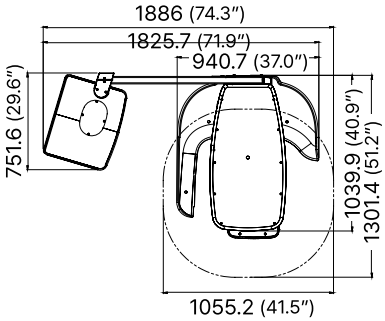

Function	CT + Pano + Ceph + Model Scan			
Focal Spot Size	0.5 mm (IEC 60336)			
CT FOV Size	12×8.5	8×8	8×5	4×4
Voxel Size	0.12/0.2/0.3mm	0.12/0.2 mm	0.12/0.2 mm	0.08mm / 0.12mm
Scan Time	PANO	4.0 sec / 14.1 sec		
	CEPH	1.9 sec / 4.9 sec		
	CBCT	13.0 sec (4×4) | 10.0 sec (8×5 - 8×8) | 15.5 sec (12×8.5)		
Gray Scale	14 Bit			
Tube Voltage / Current	60 -99 kVp / 4 - 16mA			
Weight	Without CEPH unit	Without Base	142.5 kg (314.2 lbs.)	
		With Base	195.5 kg (431.0 lbs.)	
	With CEPH unit	Without Base	167.5 kg (369.3 lbs.)	
		With Base	220.5 kg (486.1 lbs.)	
Dimensions	Without CEPH unit	Without Base	1,055.2 (L) x 1,518.8 (W) x 2,324.4 (H) (mm) 41.5 (L) x 59.8 (W) x 91.5 (H) (in)	
		With Base	1,055.2 (L) x 1,518.8 (W) x 2,357.4(H) (mm) 41.5 (L) x 59.8 (W) x 92.8(H) (in)	
	With CEPH unit	Without Base	1,886 (L) x 1,518.8 (W) x 2,324.4 (H) (mm) 74.3 (L) x 59.8 (W) x 91.5 (H) (in)	
		With Base	1,886 (L) x 1,518.8 (W) x 2,357.4 (H) (mm) 74.3 (L) x 59.8 (W) x 92.8(H) (in)
